Field checking	
History	First used April 2011, NZOF Champs. First map that we have developed that is geo-referenced with the national grid (NZTM2000) as used on the "new" 1:50,000 series maps BK39 and BL39 There are blank areas in the cartography where it could not supply contours, nor any details, under the native bush. To fieldwork these areas we used a handheld GPS unit to locate main features then re-fieldworked the areas. Two days after the National Champs this area was hit by a severe storm that caused extensive flooding and landslips. The map will have to be re-fieldworked.
