

SEPTEMBER — OCTOBER 2009

COMPASS POINTS

Compass Points is the bi-monthly magazine of the
Hawke's Bay Orienteering Club Incorporated.

Our Vision Statement – All people in Hawke's Bay
will recognise Orienteering as a genuine sport or recreation,
and will have the opportunity to experience and enjoy it.

BY THURSDAY 31 DECEMBER — WRITE IT BEFORE YOU GO TO THE PARTY**

President's Report

Welcome to spring. I dislike spring for the most part because of the nature of the business I am in, but there is nothing like a ride or a run on a clear warm spring day after the petulance and tantrums of the frequent southerlies that run up the country through September and October. Recent events held by the club have seen attendances dictated by the weather with many choosing not to attend the event organised by Tim and Rolf on the new Tauroa map. The courses will hopefully be reused for a club event next year as so few turned out to run in the appalling conditions. I understand Rolf spent quite a long time in the bath afterwards trying to thaw out. Many seemed to be waylaid by snow, but how many were actually on the Napier - Taupo road?

The Hawke's Bay contingent that went to Australia for the recent schools' challenge might not have come back with Australian titles, but they didn't disgrace themselves either. Despite some indifferent individual runs, the relay teams once again pulled through to beat their Australian counterparts. Showing the way in the Australian national individual champs though was club captain Hamish Goodwin who managed to place 1st in the sprint, 3rd in the middle distance and 2nd in the classic.

I would like to thank those setters who have set courses for the first time this year. It can be a daunting task being asked to set an event. Most of us don't get it right first time, but in much the same way that running a course is a challenge, so is setting a course that is varied, interesting and challenging. It is often said that setting courses brings a new level of understanding to the competitive side as you get to construct the problems/legs/routes for competitors to overcome. We have a large contingent of capable setters and vetters in the club, but to keep the workload to a minimum we are always looking for new setters. If you think you would like to have a go, talk to a member of the committee about it, and remember that we won't throw you in the deep end, we usually start new setters on low key events like street maps and park events and buddy them up with an experienced vetter. For those interested in learning more or just improving their setting skills, we will be running a course setters' evening early next year.

The committee has accepted a quote for the photogrammetry for the new Waipoapoa map. This will be ready for the 2011 National Champs Classic Distance and according to Hamish who found the area, it has some wicked rock and bush areas. The mapping committee may also have found a new middle distance map for the 2011 National Champs in the Maraetotara area. If access is able to be arranged then I look forward to running on both maps.

Finally, it is the time of year when we look forward to next year. As we approach the AGM in December, committee members re-evaluate their roles and the time they have served with the club. If you are interested in helping to run the club or have skills you think we need, please see me or another committee member. We would love to talk to you! Next year will be busy with mapping projects and planning for the 2011 Nationals. If you have any ideas that could help with running 2011, can design a logo for the champs or can aid in finding sponsorship and low key prizes then I would love to talk to you.

Chris

Have you visited www.hborienteering.com lately?

This is our club website and if you haven't visited recently, then have a look. This is the place where you'll find all the latest information on what is happening in the club — news, results and latest event information.

If someone wants to find out about the club or the sport, then direct them to the club website — there is information there for new members, the latest fixture information and a map of our event locations.

New Zealand Orienteering Federation
General Manager: Rob Crawford
10 Wairua Pl, Pukekohe 2120, NEW ZEALAND

Orienteering On-line at www.nzorienteeing.com

NZOF NEWS – SEPTEMBER 2009

Yes, don't fall out of your seats – NZOF News resurfaces after a few (OK, many) month's slumber with an apology from me for my slackness.

CONTROLLERS CLINIC – SAT 7 NOVEMBER

A controllers clinic is being held at Mt Lees, near Palmerston North (the residence of Graham Teahan, our Technical Director who will be running the clinic). All existing and those interested in becoming A Grade controllers are encouraged to attend.

As Graham is overseas overseeing the World Masters Championships, anybody interested in attending should notify the NZOF GM (address/ph no above), by 31 October.

TONIC WEEKEND – 30 OCT / 1 NOV

A notice on behalf of Auckland OC:

TONIC 2009 – The Orienteering North Island Championships are from 30th October to 1st November, hosted by Auckland Orienteering Club. Events include a triple mini sprint series on Friday evening, a middle distance in Woodhill on Saturday afternoon, a dinner function with golf course event on Saturday night at Muriwai, and a long distance event in Woodhill Forest on Sunday.

The event web site is now functional.

On-line entries are welcome through the event web site.

<http://www.madeventz.co.nz/tonic/>

On-line entries are welcome through the web site.

In 2008 AOC, with NWOC revived the concept of the North Island Champs with the aim of providing some quality events toward the end of the year and also to introduce an novelty element along with the traditional event structure.

AOC has undertaken to do the same again this year. It would be great to see the concept continued into 2010 and beyond. AOC invites other clubs to take the TONIC concept on for 2010.

INTERNATIONAL RESULTS 2009

The last few months have seen some outstanding performances by New Zealand orienteers overseas. Ross Morrison (HB) started the ball rolling with an incredible 10th place at the World Games, our team at JWOC left as the 10th ranked nation with Greta Knarston (CM) producing the best performance with her 19th place in the long distance, followed by the piece de resistance as Chris Forne (PP) broke through a previously unattainable barrier for NZ males by recording two top-20 finishes at this year's World Championships. Also, our Mountain Bike O team went over to Aussie and beat them on home soil again

Congratulations to these, and our other WOC, WG and JWOC team members who have represented us with such distinction.

ADVERTISE YOUR EVENT ON SPARC'S PUSH PLAY WEBSITE

SPARC have updated the Push Play section of their website and now have an events calendar. They are happy to list any details of sporting events that are open to members of the public. Any event organiser who would like to do so can complete a simple form online at the following website address: <http://spreadsheets.google.com/viewform?key=p-0XiceoJcVEHxQzJQcr8dQ>

NZOF YOUTH COUNCIL

As part of our Youth Strategy documented last year, establishing a Youth Council was seen as one initiative to encourage juniors to have more input into the management of our sport. The initial Youth Council is:

Tom Reynolds NW
Rachel Goodwin HB
Duncan Morrison HB
Jula McMillian HV
Angela Simpson RO
Alistair Richardson PP
Selena Metherell PP
Jourdan Harvey CM

With over 35% of our national membership under the age of 20, establishing good lines of communication between our youth participants and managers is an important step to continue the development of our sport at junior level. While the Youth Council is advisory only, it is a vehicle to enable the views of juniors to be heard on issues that may affect them.

TOUR O SUISSE 2010

Our good friend Dieter Wolf is organising an O tour of Switzerland just prior to next year's World Masters Championships. NZ participants on previous tours thoroughly recommend the experience and if you are intending to go to WMOC next year, and have the time (and budget), contact the General Manager for further information.

JUNIOR CAMP - FULL

Sorry, but the Junior Training Camp being held in Auckland in December is booked out and any further applications will go onto a waiting list – we have close to 70 juniors attending and any more would have the coaches and helpers sleeping out under the trees.

CONGRATULATIONS

Clem Larsen and Tania Robinson (CM) who are now married, and might explain to some who the new member in the women's elite grade is (Tania Larsen).

I would like to continue recognising the achievements/miracles of our members in these types of areas (and others) – anything noteworthy, please let the General Manager know.

New Zealand MTBO Championships 2009

Whakarewarewa Forest, 14 and 15 November 2009

Terrain: Forest on rolling to steep hills with height difference 350 – 750 metres, well established track network (New Zealand's best!), varying from gravel roads to single track. Mapping notes will be provided with final information.

Day 1: Middle distance commencing from 9:00am

Sprint distance commencing from 3:00pm

Day 2: Long distance commencing from 10:00am

Map Scales: Long distance to be 1:20,000 with 10m contours. Sprint and Middle distances to be 1:10,000 with 5m or 10m contours but this is subject to change based on final mapping details.

Visitor Services: The forest is easily accessible from downtown Rotorua and there are a number of accommodation options in Rotorua.

Rotorua has six bike shops in the CBD with varying hours of operation during the weekend and one bike shop located at the Outdoorsman on Tarawera Road.

Entry Details

Courses and Classes: For all three events three courses will be offered with the following classes as follows:

Course	Men	Women
1	Open Men	
2	Men 40 Junior Men Recreation Men	Open Women
3	Men 50	Women 40 Women 50 Junior Women Recreational Women

Ages will be as at 31 December 2009. To be part of the Men 40 category you will need to be 40 as at that date. Junior grades are under 18 years. For the recreational classes, although a course is specified above, you can enter any course length if you want but subject to final veto of your riding ability by the event organiser!

Eligibility: To be eligible for titles you must be a NZ citizen or have "NZ Residency".

Entry Fees:

	<i>Race 1</i>	<i>Race 2</i>	<i>Race 3</i>	<i>All Races</i>
All Competitors	\$25	\$25	\$25	\$60
Late fee	Plus \$10	Plus \$10	Plus \$10	Plus \$10

Late Entries: Entries close **Wednesday, 11 November**, and must be received by this date. The late entry fee will apply from Wednesday, 4 November 2009. For entries received after 11 November, although we will have a fixed number of spare maps and start times you are not guaranteed a start and your entry will be refunded if there are not enough spare maps (and you will be advised accordingly).

Entries:

Entries can be completed online or you can download the official entry form, both from the CD Orienteering website: www.cdorienteering.co.nz.

Please note the weekend is using electronic punching and you will require an e-card. You must advise us of your SPORTIdent number if you own an e-card; alternatively e-cards can be hired at a cost of \$5 per event or \$10 for all three events. E-cards are available for purchase from MapSport Services: www.mapsport.co.nz.

Previous Orienteering Maps:

Whakarewarewa Forest has been used for a number of year for both foot orienteering and MTBO. Whakarewarewa Forest was first mapped by Kent Dickson a few years and there has been a substantial update and rework of that map in 2009 by Michael Wood and others, resulting in a relatively brand new map that will be used at the event for the first time.

Embargo:

Considering the amount of recreational use Whakarewarewa Forest receives it would be impossible to embargo the area. However, we request that no-one does any specific MTBO training in the Whakarewarewa Forest between now and the event.

Personnel

Controller: Chris Morris, Taupo

Planners: Brent Edwards, Darren Ashmore and Marcus Diprose, Rotorua

Enquiries:

Marcus Diprose
021 42 4443 or 07 362 4645 (after hours)
Marcus@marcusdiprose.com

Note: final information (mapping notes, estimated course times, pre-allocated start times, how to get there) will be posted on the CD Orienteering website in the week leading up to the event.

Horseshoe Bend 'Ton of Fun' Event

Sunday 29 November

Just when you thought it was safe to come back to orienteering . . .
We present this year's team event

We're calling it 'a ton of fun' as your team must do the ton — they have to be a hundred years old!

A team must have four people in it whose combined age must be over 100.

You can ring around and try to put together your own super team or just turn up and rope in some others who are hanging around the caravan.

When you have your four, all register at the caravan together, giving your team a silly name. Maybe you could try an anagram name — for example if you were Snell, Morrison, Uphill and Goodwin, you could be SMUG.

The aim is for your team to collect all 27 controls, so it's a timed event, not a score. Your team won't need a mountain goat or a marathon runner to get them all. How you divide up the task will be important.

We aim to make this event fully electronic.

Check the website closer to the time for details and any other course options.

END THE ORIENTEERING YEAR IN STYLE!

Inter-Club Competition and WOA Prize-Giving

Sunday December 6th

Put Sunday December 6 in your diaries now!

This year we are going to end the season with an extra-special occasion hosted by Hutt Valley OC at Battle Hill Farm Forest Park. It will feature the annual Frank Smith inter-club competition, and presentation of Orienteer of the Year and WOA Championship certificates for 2009.

The Frank Smith Trophy was donated by the Hutt Valley Orienteering Club for an interclub competition within the Wellington Association, to recognise one of its founding members. Along with Peter Hewlett and Peter Marks, Frank was one of the instigators of orienteering in the Wellington area. He spearheaded the formation of HVOC, drew its first maps, and bought its first gear. In fact the club still use his "white box" to hold its registration equipment

It is a competition in which all ages, courses, sexes and clubs can compete on equal terms. The top 12 individual scores for each club count towards the final total, but it is still possible for a club to win with fewer than 12 runners. This year's competition will feature a new Battle Hill map extending into the pines over Transmission Gully – steep but very clean!

So turn up and run for your club on any course from Red Long to White, and stay on to applaud your 2009 Regional Champions and Orienteers of the Year – or come and be applauded yourself.

b4nuyear2010

Orienteering Taranaki Invites You To *Party With The Turkeys!*

3 DAYS OF SHORT O'S: Two events a day!

Reintroducing the Turkey Traverse - the longest & last O race of the year!

Event Schedule

Date	Map Morning	Map Afternoon

Social events planned:

- Monday 28th Bring your own BBQ food and swimming gear to Audrey Gale
- Tuesday 29th Pukekura Park Lights and Live Music
- Wednesday 30th Quiz Night with Annie
- Thursday 31st Celebrate New Year at Karl's place

More info coming soon <http://www.madeventz.co.nz/b4ny/events.cfm>

Rainfall is not unknown in Taranaki, so this can be the page where we publish Alan's thoughts:

on the subject of rainfall

About 500,000 million litres of water fall on New Zealand as rain or snow each year. That lot has to go somewhere, as those who attended the Tauroa event may have observed. But think nice thoughts about the rain as you trudge around in the stuff. It takes 70 litres to grow an apple, 140 litres to make a cup of coffee and 1000 litres to produce a litre of milk.

Sprint dirty.d **The Bay**

- **6 Sprint Races**
- **3 Days**
- **1 tour**

Hello and welcome to Sprint the Bay, the only orienteering tour in New Zealand. Take the weekend off and come to race on 6 of the best sprint maps in Hawkes Bay. From tarmac to stream beds, buildings to hedges there is something here for all orienteers. Be sure to read the information about the events at www.sprintthebay.com and how the results will be calculated, note the differences between some of the grades. Book the weekend into your calendar as its going to be a good one.

Friday 22nd of January 2010

Day One– Event One: Havelock North Village

Saturday 23rd of January 2010

Day Two- Event Two: Arataki

- Event Three: Tainui Kerunga

- Event Four: Woodford Iona

Sunday 24th of January 2010

Day Three– Event Five: Frimley Park

- Event Six : Napier Boys' High School

What is the tour?

At Dirty d Sprint the Bay 2010, a tour format will be adopted to find the overall winner. For all grades total times for all or most races will be added to find the overall winner. Like in a cycle tour, the tour leader will wear the yellow singlet provided (elites only). This will be kept by the overall winner at the end of week-end. There will also be a green singlet competition for fastest sprint finish and spectator leg times combined. Once again the singlet will go to the elite grades but this will also be a sub-competition for all grades. Apart from the first stage start draw, all other start draws will be the reverse of the overall classification from the previous results as they are as at the start of that stage.

For the M/W45 age grades and M/W14 grades 5 out of 6 of your times will be added to find the overall winner. M/W60 age grades and M/W10 grades will only count 4 out of there 6 times.

www.sprintthebay.com

Help at the Kaweka . . . and run it too

The 21st Kaweka Challenge is fast approaching — Feb 27 & 28, 2010. For those new to the club, this is our major HBOC fundraiser, bringing in between \$3500 to \$4500 every year. Over the years about \$70 000 has come back to the club through the effort of the volunteers who have run this event over its history.

It is run in conjunction with Heretaunga Tramping Club and the local branch of AREC (Amateur Radio Emergency Corps) who also share in the profits from the event.

We will need help from club members as the actual weekend is quite labour-intensive. Jobs include: gear checking, marshalling, manning control points, event centre setting up, race bag stuffing, competitor tracking, merchandise selling, registration, results handling, medical assistance, track clearing, track marking . . . you can see that the list grows as we think about it.

At each event a number of people end up letting us know during the week prior that they can help – but of course the jobs have to be allocated well before this. We would really love to get some of these jobs tied up before Christmas. There will be sign-up forms available at the club caravan from the next event onwards, as well at the club dinner. Are you able to help us prior to the event, during the event or even packing up afterwards? It could be for a couple of hours between now and the event, or helping across the whole weekend itself.

It's a great atmosphere up at the event centre – competitors and workers camp up there. Why not join us? You could help on one day and enter an event on the other day ! Bottom line is – if you have some time available, we could fill it for you!

Have a look on the website – www.kawekachallenge.org.nz . . . let us know if you want some posters to hang up at work, at your sports club, at the gym — anywhere really.

Thanks to those club members who are already heavily involved in the prep for KC 2010 – your help is much appreciated.

Any queries to kawekachallenge@gmail.com or give Louise or Tim a call on 8449933.

If you can't help with the event, what about entering one of the races up there..there are courses for almost all levels of fitness – ranging from 12km to 48 km.

What's a rogaine?

For many years we have toyed with long easy courses to attract fit runners with low navigational experience.

We have generally given up through low numbers when they ARE offered, and runners' inability to see beyond the number of kilometres on a course.

However an interesting thing has happened with rogaines. Initially very long distance in the countryside, the afterwork rogaine phenomenon has seen events become shorter and shorter and come into town. Participants who would not go to an orienteering event are running events around Wellington for example as short as an hour, convinced they are rogaines.

This is good. There isn't any fundamental difference anyway, just long and short and fixed order and score and night and day orienteering. Clubs which don't run rogaines should consider using this label – it works. What's more, "rogainers" often from adventure racing circles are planning and running these events.

There is a slight administrative problem. NZOF has an event levy policy which has a lower (12.5%) levy for "rogaines". For the levy (if not for promoting events) it is necessary to distinguish a rogaine from an orienteering event. At the 2002 AGM this was defined as "under the NZ Rogaining Rules, when they are formed"; and until then with a minimum length of 3 hours.

NZOF and the (separate) NZ Rogaining Association have now agreed on a set of NZ rules, based on international rogaining rules. They define rogaining as: "long distance cross-country navigation for teams travelling on foot. The object is to score points by finding checkpoints located on the course within a specified time. Checkpoints may be visited in any order." There is now no mention of a minimum length. For the levy, the NZOF Council, with advice from the NZOF Rogaine Committee, has decided on 2 hours, because this is consistent with the International Rogaining Federation's own views, as stated on their website.

So you are welcome (and encouraged) to promote short score events, either for individuals or teams, as rogaines; but to qualify for the rogaine levy it needs to be a team event of at least two hours.

Rob Crawford (NZOF General Manager) and Michael Wood (Convenor, NZOF Rogaine Committee).

JUNIORS LOOK!!

2010 HAWKE'S BAY ORIENTEERING CAMP

January 25 – 28, 2010

This camp is for all orienteers of intermediate (Y7-8) school age or older who want to move up to yellow, orange or red level. The aim of this week is to upskill so you can move on to the next colour level with ease. As usual we will be using some coaching expertise from outside the club.

Accommodation will be at Moore Road camp, near Havelock North in bunkrooms and all meals will be provided.

Further information and application form will be available at the beginning of December on the club website.

Further than you thought

Just in case you thought your Te Mata Park course was a weensy bit further than you had expected — it was.

The map says the scale is 1:5000 but that is just to sucker you into having a go. In reality the scale is 1:5500, and always has been since the very early maps of the park. So 3.9 kms on the red medium control descriptions really means 4.3 kms. And given the nature of the terrain on this map, 4.3 kms in straight lines between controls on the red medium meant about 7.0 kms on the optimum navigable route. But if, like the rest of us, you navigate at slightly less than optimum efficiency, that brings us up to 7.5 kms of actual distance travelled.

But wait, there is more.

On an efficient route choice there were 125 'up' contours, or 625 metres of climb. If we allow the standard measure of one metre of climb being equivalent to ten metres on the flat, that red medium 7.5 kms stretches out to 13.75 kms on the flat.

Hmm. If you had mistaken the direction and run the road westwards for that distance you would have ended up at the Hastings Hospital. Or the cemetery. Take your pick.

(Thanks, Alan. Of course the figures you give are just for the wimpy red medium course. Red long was the test of real orienteers, eh Georgia?)

What's all this about Smedley?

At the beginning of the year a group of elites in the Wellington Region started getting together for runs and dinners. As the year progressed ideas were bounced around about what a great idea it would be to have a wider regional group or squad that was open to any red level orienteers who were keen and committed to improving their orienteering. A couple of months ago we decided to make these ideas a reality and have loosely formed a Wellington Regional Orienteering Squad. Although the group is still in the early stages we have decided that the squad should focus on members/participants improving their orienteering through regular training (both technical, on maps, and physical in the form of group runs). Another key aspect would be the sharing of responsibility of planning training amongst all members, pairing less experienced setters up with the more experienced. We also envisage that the squad will help bring some juniors through the ranks, as well as providing motivation within the squad to keep competing in a sport that is not widely recognised and funded. So far as a group we have had three decent after work group runs, followed by potluck dinners, and held two training days. The first of these training days sprint training on two maps held on the Saturday before the Winter Classic. The other was a full days training on Osgiliath held last month. For both days we extended invitations to club members to join us, provided they are able to keep up. These training days were very successful, each having about 20 people attending and good comments were received afterwards. Another goal of the squad is to bring new life to the local Super Series team, the Central Magic. Although in the last few years the lower North Island has been home to some of the top orienteers in the country, Central Magic have finished last in the teams competition of the Super Series the last three years. Our current aims are to reinvigorate Central Magic through the establishment of a wider Central Magic squad, with members in Hawkes Bay, New Plymouth and the Wellington regions getting together within their regions regularly for training. By being more inclusive and open we hope to increase support for the team from within the clubs, and in general get people more interested in what is happening in the Super Series. As part of this we are looking to rename and rebrand Central Magic, including new tops, and supporter tops to encourage regional camaraderie. In order to do this, we need to include other Central Magic members in our planning process, and keep them informed about our activities. Would you be able to please pass on this email and my contact details to those who have competed in the past, or may be looking to compete in the future for Central Magic. Also anyone who is likely to be interested in our plans as we would like them to be on the contact list. Our thoughts at this stage are that you can help us with contacting juniors as we don't know them as well at club level. Basically we just wanted to let the clubs in the area know what we are up to and to keep in touch. We hope that we have your support in our endeavours. If you have any ideas or queries please let me know. Especially as we are still trying to get the squad up and running. Regards, Sarah Gray and Lizzie Ingham
(This group has a training on Smedley on Sat 7 November and will run the HBOC event on Sun 8 Nov)

Member of the Month

September — Holly Edmonds

Holly is quickly becoming a seasoned international after going to Spain with her Napier Girls' High School team representing New Zealand at the World Schools' Championships in April, and more recently going to Australia in the New Zealand secondary school team.

In Spain, Holly's best run was her 20th place on the long course, while in the Bendigo area for the Southern Cross Challenge against the Australian state school teams, Holly's team came third in the relay. Her other good runs in Oz were a second place in W14 in the Victorian Champs long course (through thick forest and vague contours, she said) and a third place in the Australian Sprint Champs in W16 on a park course.

Back in the shaky isles, Holly is the current New Zealand secondary school junior girls' titleholder, won the Hawke's Bay title and ran third at North Islands.

A harrier, too, Holly won the Hawke's Bay Gisborne W14 cross country title at Park Island and ran second in Gisborne at the East Coast school cross country champs.

As for the photo above, Holly is having her Marie Antoinette moment . . .you know, let them eat cake.

How long have you been involved with orienteering?

About three years. My last year at intermediate.

How did you get involved with orienteering?

Through Mrs Anderson at Taradale Intermediate. Can't remember if I stepped forward or she asked me, but I liked the idea.

What do you remember about your first event?

Um . . . I was dreadful. I went out with a friend and we both got lost. It was a white course at Tangoio. After that I gradually improved.

What courses do you usually run?

Red short or orange. I don't have a set plan as to when I run what.

What do you enjoy about orienteering?

The fact that you get to see so many places that you wouldn't even know were there. And meeting all the new people . . . and the travelling round.

If we met you during the week, what would you be doing?

Probably running. My coach is Wayne Smith. Or school work. I enjoy doing ballet . . . it keeps me fit. And what photo are you using — is it a bad one?

Member of the Month

October — Greg Pearse

The man you will have seen on the computer at the EIT, Te Mata, Tauroa and Te Awanga events is Greg Pearse. With Pamela away for some of that time, there was a need to upskill someone who could train each pair of setters and vettors in the process of set-up; set up each event, oversee the event from an electronic point of view, tidy up at the end and email the results to David. Greg is that man. Claiming to have 'the memory of a goldfish', he said he needed a two-hour session to be shown himself what to do. This has been his 'frontal lobe challenge' for 2009.

Challenge 2007, Greg recalls, was to set his first course, a team score event on Havelock Hills. He learned the value of checking every control site, when he discovered on event day that the re-entrant he thought he knew on the back field of Iona had been filled in . . . and all the trees in a dead-end street had been chopped down. The Iona incident came from Greg's reluctance to be found lurking round a girls' school grounds at dusk, so he chose not to do the check.

How long have you been involved with orienteering?

About four or five years, generated by my daughter Olivia.

How did you get involved with orienteering?

Livvy started with Jo Eames, at Woodford I think. I took her to a course and that's where I caught the bug.

What do you remember about your first event?

That first one with Livvy was a white course in the Botanic Gardens on Bluff Hill. When we finished, she wanted to go round again. I went along to prove I could still run . . . and proved I couldn't. I was in jeans and shoes, which didn't help.

What courses do you usually run?

Red short, and probably always will. Anything longer than Red Short would have to be a two-day event. I think we should have another grade called RSI for Red Short Idiots. I'll be lobbying for that — our ambition will be to get home before dark.

What do you enjoy about orienteering?

Everything really. It's tremendous company, before you start, during the event and afterwards. I'm deeply impressed by the huge organisation. It's like Manchester United or something. It's just amazing. So professional. I love the fantastic courses, all the farms, even the street courses.

If we met you during the week, what would you be doing?

Right now, getting cabin fever. I'm applying for positions, and in my line of work (corporate treasurer) there aren't many of us. I'm currently looking at one in Australia. That's why I've been able to put time into the club. It's also why I can't commit myself to anything.

Hawkeye

With the demise of the magpie, the committee decided to resurrect a page devoted to little mishaps, achievements and interesting information regarding club members. If you have any good stuff you'd like to share with the rest of the club please forward it to a committee member

Mitchell Jones is a bit of a daredevil. He decided to ride his bike down a slide . . . a slide with bends in it. He crashed and broke two bones in his arm. He then had to walk home to tell his mother!

While Tim and Naomi were out at orienteering, Louise Anderson was giving the sermon at their local church. Don't worry, she made it to the event later!

Dave Fisher has splashed out and got Broadband. He figured he could cancel the *HB Today*, get Broadband and still have a few dollars left over. Good move, I say.

Hamish has a problem with his email address – it's sending out orders for Viagra and other sexual enhancers. He says he has nothing to do with it . . . but hey, do we believe him?

Tim and David Barclay are pretty keen – they rode the Tour of the Bay in the morning and orienteered at Te Awanga in the afternoon.

How about Paul Jensen who ran in a score event recently – he did his first loop then proceeded to do his second loop. When he got to the second control on the second loop, he realised he was doing the first loop in reverse . . . don't worry Paul, we've all been there !

A number of people, after following the tape in and out of the trees to the start at Tangoio, asked Chris how he managed to get his ute in there . . . it has wheels and he drove it !

Brandon Jones is one bright cookie – in a recent Maths exam he placed in the top 0.3% in New Zealand. Well done Brandon.

Ieuan Edmonds has been a ball boy this year for the Magpies at McLean Park.

Sean Morrison was a member of the HB Curtis Cup hockey team which won their tournament. He then went on to represent HB in the Hatch Cup.

Sarah Baxter and Grace Irwin were in the Collier Trophy hockey tournament recently and their HB team came a very creditable 7th = out of 23 teams

Rochelle Sceats was ninth at the Mason Invitational 8km in Springfield, Oregon.

Hamish has to feature again after his recent email which noted that "orienteering 'loses' a lot of (our) younger members". Two readers picked up on that one . . . and Rolf thought that maybe we should give them a map in future and then they wouldn't get lost.

Tangoio OY5 (Score Champs) — 6 Sept 2009

Tangoio Setter's report

First, a confession. I prefer running regular courses to score courses, so I quickly put my name down to set a score event so I could still run all the standard courses.

(and there are a few less controls to put out . . .)

Although the Tangoio map has been used a lot for events in the last couple of years, we have not had a score event there. It was reasonably straightforward to set – plenty of tracks for the white course and to also give the yellow level runners some good handrails to plan their score courses. Much of the planning time was spent analysing possible 'best routes' to get the spread of controls right so the fastest runners would be close to getting them all in the time allowed.

Luckily the day did not clash with the Gun Club shooting day. We didn't want the target shooters having their own score event bagging orienteers as they crossed the firing range. The Police were having a bit of target practice the day Chris and I went to check some control sites. It's a bit disconcerting hearing shots echoing up the valleys, especially when some of them sound like they are ricocheting around a bit . . .

Event day went well and I think the spread and difficulty of controls was about right with a few people scoring in the forties and a good range of scores across the grades.

This is the first time a score event has been included in the OY series and if feedback is positive and the scoring seems to work out fairly it will probably be something we do again. However it is possible that parts of the Tangoio map may not be useable again for some time as it is rumoured that logging and thinning the forest will start soon.

Thanks to Chris Howell – an experienced vetter makes setting courses an enjoyable task. Thanks to all other helpers on the day.

Mark Irwin

Te Mata Setter's Report

Planning

A score event has usually been set on the Te Mata map. However the club would have already had its score champs so it seemed a bit pointless to hold another score event. By the time my event was held, it also would have been about two and half months since a normal multi-course event. I therefore set about planning a full range of courses.

A few weekends of traversing the park, gave me a good understanding of the terrain (and also the number of club members training on it regularly). The event centre was finalised to be at the first carpark above Peak House. This gave a different start location to the usual bottom carpark but still allowed use of a highly tracked area for the whites and yellows.

First up I thought I would get these whites and yellows out of the way, but straight away this gave me my first clue that there is a lot more to course planning than meets the eye. I had never really done a white, yellow or orange course so what did they look like? (Mental note here – do some of these courses) Research among my family gave me a few ideas but not a totally clear picture of what a yellow control could and couldn't be. The setter's instructions, and some advice from my vetter when we went out together, put a few more bits of the jigsaw together and suitable courses slowly formed on my computer screen. My vetter, John Craven, who was also a first timer, gave me my next valuable advice as I tried to work out the red courses (which I think he attributed to Derek's wisdom), look for the route choices first, then the controls. With this in mind, and the three main ridges that make up the park, the red routes began to form. Course lengths became the next big dilemma as I spent the next couple of weeks shortening and then lengthening the courses as I spent hours mulling over the stats on Te Mata on the minimum, maximum and average historical course lengths.

On the day

Given that Te Mata was open to the public, I decided electronic controls were only going to be used for the start and finish. Thankfully John had put out some far away controls the night before, but we did most early Sunday morning. Setting up the toilet proved to be one of my biggest jobs. I had decided to use the chemical type as digging long drop holes in Te Mata Park didn't seem quite right – no problem with this, but working out which poles to use for the tent was quite a bit of a brain teaser.

First customers arrived early at about 10, which Chris had warned me about at Tangoio so I was sort of expecting it. My excellent helpers, Tui and young Max at the caravan, Greg on the computer, and John at the start really made the day work and lowered my stress levels.

After the first runners left I waited nervously for people to come back so I could check the course running times. Initial white and yellow times calmed the nerves but then as orange and red runners arrived back, it became apparent that I had done a poor job of trying to endear myself to fellow club members, with courses that were too long and/or with too much climb. I apologise to those that felt as stiff as my kids did for the next few days. Certainly disappointing to try and set an event to encourage orienteering and then find you may have done the opposite.

I learnt to get around the Peak fairly well while planning the event and then tried to use this to build good options for route choice into the red courses. I appreciate the lengths some people went to ensure every possible route was tried, even when up a gully of dense bush.

The other new thing I tried with this event was printing maps at the event. This meant I could do away with the need to guesstimate how many to preprint. Printing to order also allowed the courses to be preprinted on the maps. With my old power-hungry colour laser printer, the setup for this was a bit more complicated and time-consuming than I had hoped. However it worked well enough to be able to say it is achievable to have good quality maps printed on-site and on-demand.

Again really big thanks to my vetter John Craven, along with Tui, Max and Greg who helped a first timer so much. Thanks also to Sarah Cornes and her Mum, Phillip Baker (not her Mum) and my daughter Catherine for collecting controls. Also I appreciate all those who thanked me even as they limped away.

Setting my first event was certainly a learning experience and will make me look at maps a lot differently in the future. It also gave me a whole new amount of respect and appreciation for the work that setters, vetters and even event helpers put in to make the events happen.

Tim's Tauroa report

I thought I would try this great new website to help write my course report. You should try it.

What a (fantastic day . . . lovely day . . . damp day . . . utterly miserable foul and wet) Sunday, when we ran the course on (Tauroa . . . Te Mata . . . Over the Hill . . . Horseshoe Bend) map on the (1st . . . 2nd . . . 3rd . . . 4th) weekend of (Jan . . . Feb . . . Mar . . . Apr . . . May . . . June . . . July . . . Aug . . . Sept . . . Oct . . . Nov . . . Dec) 2010.

At the start the runners managed to look as though they were (on a tropical island . . . so fit and ready . . . hung over from the night before . . . frozen to the core).

By the end of the event they looked (fresh as a daisy . . . tired but happy . . . frozen, wet and cold with a definite bluish tinge . . . catatonic).

It was great to see that a good number of people turned up, enough to (fill a dinghy . . . fill a bus . . . fill a

marquee . . . fill the entire cast needs for an Orc scene from Lord of the Rings).

The map we used was (brand new . . . vaguely familiar . . . an oldy but a goody . . . able to be run with a blindfold).

We felt as though we had plenty of time to (set and vet . . . even arrange appalling weather . . . completely start again two days out from . . . go to the pub and forget all about) this course.

The vetter in his role (took over and set all the courses . . . worked hard to make sure that we worked together . . . just said yes to all my courses . . . I had a vetter?)

It is so good to work with the club's gear that is stored so efficiently in (a shed . . . a trailer . . . a caravan . . . a 'B' train).

It took us (a couple of minutes . . . a couple of days . . . a couple of weeks . . . a couple of months . . . a couple of years) to get this event fully up and running, quite quick really.

We were very grateful for the benefit of (the great club equipment . . . the friendly farmer . . . the inquisitive cattle . . . the drying space for all the wet gear after the event).

Many thanks to all those extra bods who helped with (control collection . . . drying wet clothes . . . providing yummy food to buy . . . getting stuck vehicles out of the mud).

This course report was made with the help of www.instantcourserereport.com

Some tips for using electronic timing

- * We are now using electronic timing for most club events. Here are some helpful hints:
- * If you don't already own one, consider purchasing your own SI-chip. You won't buy one cheaper than from the club (\$56) and you can always sell it if you decide to retire.
- * If you are running Red Short and you're a vet, tell the operator your grade is Red Short Vet.
- * If you're using your SI-chip for a second time (running a second course) ask the computer operator to firstly renumber (to any random number) the chip on your first course.
- * Don't wait for the operator to download after your run — if the master station (the red one attached to the computer) is free then help yourself.
- * Report any damaged gear to the operator — things like broken elastics on hired SI-chips.
- * If you're collecting controls, then remember to take a vest to carry the stations. DO NOT carry controls with stations attached.
- * Stations have a little display screen on the bottom — when a station is activated (by punching with chip) it displays the station function, number and time.

Setter's Report

After getting the map three months ahead of time and spending hours designing devilishly devious courses, it was a significant let down to learn that middle distance did not mean red long covering 6.5 kilometres with enough vertical climb to get altitude sickness. So with the measured and rational input of Hamish, it was back to the drawing board to create something that wouldn't be quite such a feat of endurance, but more of a test of navigational skill.

An OY is much more difficult and time consuming than setting a score course, but it's also a great way to learn a little more (with subtle, but persuasive guidance) about orienteering in general and route choices / navigational thinking in particular. A little more time in front of the computer than a few hours checking ground positions and sight lines would have had us comfortably organised – except for the cattle. A mob of adolescent bulls can be a tad off-putting when you cross their territory, so a few last minute changes were in order to keep most of the runners outside of the bull ring.

Apart from a minor difficulty with the low slung electrical connection on the caravan while traversing the stream bed on the way in, control placement on the Saturday went without a hitch. Mainly thanks to Cam and especially to Hamish, for putting out more than anyone else and checking the entire ranges of courses in very short order. Sunday dawned fine(ish) and the weather held until it was time for control collection – for which thanks must go to the Yule family, Cam Edmonds and Hamish (again). Also thanks to Sue Edmonds for manning (womaning?) the caravan, Greg Pearse for explaining the mysteries of the computer, Pamela for fixing my mistakes on the computer, and Dave Fisher for help with set-up. Hope I haven't forgotten anyone.

It was great to get so much positive feedback about the event (although #6 seemed to figure regularly in the "...if I only hadn't wasted time on that one..." lament), but credit must go to Hamish for his carefully considered placements and attention to detail.

Grant Edmonds

. . . and we even orienteered

As we landed in Australia early on a Thursday morning I decided to waste some money on my brand new XT phone. I went online and straight to facebook. My status update was changed in several seconds and all of a sudden it was "Jaime Goodwin has just arrived in Melbourne . . . hello sunshine and a tan!!" Hamdog would not be impressed to know that was a definite waste of \$1.87. The next week and a half it rained. It blew. I froze. Well, actually I lie; we had a few glimpses of the sun and brought the grand team total of short-wearing time to approximately ten minutes.

The first day of the schools carnival was one of those glimpses as it was a tiny bit sunny. We all arrived at the event centre nice and early, as the NZ army. The day comprised relatively long and intensely fast courses. New Zealand had some awesome results with a special mention of Angela Simpson for winning the senior girls' grade by one second over Belinda Lawford.

So, there we all were, behind enemy lines. Sergeant Diz and Sergeant Red manned the tanks, while Duncan was team chant officiator, Matt and Angela the speech writing extrordinaires, Liam was on female occupation territory, Nick turned out to be president of the "I love Duncan" fan club, Gene flew the aeroplane (not very well I might add), Lauren was in charge of international relations and Holly was a key player in the "let's distract Shane Keely from orienteering" mission. We had the edge over the other states at the end of day one, but we needed to pull out some big performances at the relays the next day.

We started off great. And finished off great. The relay results were spectacular and Duncan Morrison flew faster than Usain Bolt down the boggy finish chute with an exciting end to the senior boys' grade. We were safe in first place and Derek was ecstatic to have the Southern Cross Trophy in his hand luggage for yet another year!

That afternoon we headed to Bendigo and spent up large at a glorious opportunity shop. The boys looked fabulous in their shorts, princess crowns and sashes that night at the disco. We were dressed to kill as Beauty Queens; in case you're wondering, yes, Derek dressed up too. He was labelled "Miss Tache", however, he opted out when it came to wearing just girls' shorts for the night! Queensland's poor attempts to outdo us by dressing as jungle animals were automatically ignored when Tim Robertson walked in wearing size three stripy, flannel stubbies.

I really enjoyed our trip to Bendigo and encourage all of you guys orienteering at secondary school level to push yourselves just that little bit harder throughout the year. Getting in the NZSS team is a totally achievable goal with a bit of hard work and it's definitely worth it. Australia is tricky terrain and the Aussie Schools Carnival is a taste of international experience that you will never forget. I'm starting to set my goals to try and make the team again and can't wait for next year!!! J

HAWKE'S BAY ORIENTEERING CLUB
2009 "ORIENTEER OF THE YEAR" SERIES

Points to date in the 2009 "Orienteer of the Year" series.

Seven events are classified as "OY" events during the year. The winner of each course (men & women) each receive 25 points and points are allocated to other competitors based on times compared with the winner.

Once a member has competed in two events on one course, then this becomes the only course for which they can score points.

Jan 24	Sprint the Bay 5	Frimley Park	
	Sprint the Bay 6	Napier Boys' High	
Jan 27	Summer Series 1	tbc	

HAWKES BAY ORIENTEERING SHIRTS

ARE YOU KEEN TO ORDER?

THE MORE WE ORDER AT ONE TIME THE CHEAPER THE SHIRTS WILL COST.

If we order 25 they will be \$70 each, anything less than this incurs a oneoff setup printing cost of \$150 that needs to be added to be divided between the number of shirts ordered. So now is the time to order, the more we get the better (More than 25 shirts will be 10% discount).

If interested phone Jo Eames 8778018 or email j.eames@xtra.co.nz

There is a mens and womens shirt sizes sm med lge

SPARC
ihi AOTEAROA
Sport & Recreation New Zealand

Hawke's Bay Orienteering Club thanks SPARC for supporting orienteering!
